TCS Arms + Influence

[NO H-bomb attacks - ever - in the era,  
a missile existed.

Allen, (1952)

Should other countries (not just UK - co-producers -  
have a voice in a decision [US or other] to  
launch nuclear attacks?

289 There is no "translation of men - use" of arms  
[TCS mistakes when

OST's threat was made, to which Allen adopted:  
not Perm, but after Chinese entry!]

[NAK - Not Professor: Moral (political) sanctity!  
(1957) - CNW

TCS is wrong, & misleading, in being repeatedly  
to inhibition against "use" - ignoring historical  
facts of threats, even though (of course) he is explicitly  
aware that threats occur, implicitly (but also, explicitly!)

He ignores: for Korea OST, Korea 1953, Peng 1955  
(and 1958, not mentioned is afterward), only UK 91,

"a question... whether the right have 'used'"

[<sup>explicit</sup> if the threat - use had failed!]  
no mention of this premise

|| So he ignores bearing (!) of actual threat-use in  
"talk" against "coherent (sic) use: attacks - carrying out  
threat: ("Must" a threat be a total bluff - although not to be  
perceived as such? - not "norm")

TCS: How to ~~strengthen~~ "tradition of ~~total~~ non-use,"  
inhibition against use (how, incentives to  
acquire)?

necessity (w. the on war).

[It's not surprising that the SD was as rational  
in "use" of war as US - US is an outlier on this:  
even US has been rational (VN: no thanks to
